EXPLANATORY NOTES

This Bulletin contains particulars of weighted average minimum weekly wage rates for adult males (by months) and adult females (by quarters) for the period January, 1957 to June, 1961, together with index numbers with base : year 1954 = 100.

A description of the Minimum Weekly Wage Rate Index, and wage rates and index numbers for adult males (1939-1959) and adult females (1951-1959), as at the end of each quarter, were published in Statistical Bulletin 786 of 19th February, 1960. Statistical Bulletin 902 of 20th February, 1961 contained a dissection of the wage rates for adult males into the three components of the total minimum wage, i.e., basic wage, margin and loading, as at 31st December, 1939 to 1958, and monthly from 31st January, 1959 to 30th November, 1960. The information contained in these two Bulletins is revised herein for 1958 and subsequent years, and the series is advanced to 30th June, 1961.

The minimum wage rates used in the index, for representative occupations within each industry, have been derived from representative awards, determinations and agreements. In many cases when awards, etc. are varied, the new wage rates are made retrospective, and in such cases the index is revised to incorporate the new rates as from the dates from which they became operative. Also, there is generally an unavoidable, and sometimes considerable, delay in the receipt of notification of changes in margins and loadings in respect of the occupations included in the index. For these reasons, current rates and index numbers are always subject to some degree of revision.

Wage rates for the year 1957 have not been revised, but, as the rates for adult males for 1957 and subsequent years are now available as at the end of each month, the opportunity has been taken to publish them herein. Wage rates for adult females are compiled only as at the end of each quarter. Considerations of space preclude the publication of revised figures for each industry group in each State, but these are available on request.

Weighted averages of the components of the total minimum wage rate are calculated separately for employees covered by Commonwealth awards, etc. and for those covered by State awards, etc. Relevant definitions are as follows: -

"Commonwealth awards, etc." include awards of, or agreements registered with, the Commonwealth Conciliation and Arbitration Commission, and determinations of the Commonwealth Public Service Arbitrator.

"State awards, etc." include awards or determinations of, or agreements registered with, State industrial tribunals, together with certain unregistered agreements.

"Basic wage" rates are weighted averages, and therefore differ from the metropolitan basic wage rates determined by Commonwealth and State industrial tribunals.

"Margins" are minimum amounts, in addition to the basic wage, awarded to particular classifications of employees for features attaching to their work, such as skill, experience, arduousness or other like factors.

"Loadings" include industry loadings and other general loadings prescribed in awards, etc. for the occupations included in the index.

Further information in respect of the index will be found in Statistical Bulletins 786 and 902 and in the annual Labour Report. Current figures are published in the Monthly Bulletin of Employment Statistics.

TABLE 1. - MINIMUM WEEKLY WAGE RATES : ADULT MALES, ALL GROUPS (a)

Weighted average minimum weekly rates payable for a full week's work (excluding overtime), as prescribed in awards, determinations, etc., and index numbers of wage rates.
